## GUIDE TO THE GOOD LIFE

.....

Choose a wife that will always be your best friend

Love the occupation you finally decide on

Be good at whatever you choose

Play golf whenever you retire

Walk in the countryside often

Do not take life, or yourself, too seriously

Drink and eat, always in moderation

Be slow to anger

Be easy to forgive

The hardest part of most jobs is starting them

All things pass

99% of your worries never materialise

Do not regret your mistakes but learn from them

If you are feeling down count your blessings

If you don't feel great after counting,  
count again

Avoid arguments because there are no winners,  
only losers

Do not hate, it is a poison

Love all people and all of nature's creation

.....
